No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            The present invention provides compositions comprising ospC proteins and chimeric ospC proteins from members of the Borrella genus. These may be Borrella burgdorferi, B. afzelli or B. garinti. These can be used as vaccines against Borrella infection, which is spread by ticks and leads to Lyme disease.

These may Borrelia burgdorferi, B. afzelii or B. garinii. These can be used as vaccines against Borrelia infection, which is spread by ticks and leat to Lyme disease.

                                                                                                                                                                                                            The present invention provides compositions comprising ospC proteins chimeric ospC proteins from members of the Borrelia genus. These may Borrelia burgdorferi, B. afzelii or B. garinii. These can be used as vaccines against Borrelia infection, which is spread by ticks and lea to Lyme disease.

                                           vaccines
to Lyme d
                                                      The present invention provides compositions comprising ospc protein chimeric ospc proteins from members of the Borrelia genus. These mo Borrelia burgdorferi, B. afzelii or B. gazinii. These can be used vaccines against Borrelia infection, which is spread by ticks and

These may be Borrelia burgdorferi, B. afzelii or B. garinii. These can be used as vaccines against Borrelia infection, which is spread by ticks and leads
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       144 lksehavigldn1tddnagrailkkhankdkgaaelekifkaveniskaagdtlknavke 203

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                The present invention provides compositions comprising ospc proteins and chimeric ospc proteins from members of the Borrelia genus. These may be Borrelia burgdorferi, B. afzelii or B. garinii. These can be used as vaccines against Borrelia infection, which is spread by ticks and leads

                                              Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      DB
